2026-2027 Regional Tournament Study Guide – Fall Question Set - Asia

Instructions: This study guide should be your first step in preparing for the [National Geography Bee Regional Tournaments](#) on the Fall Question Set. Many of the facts below are found in the 120 questions on the Fall Question Set. Other facts in the study guide will be found in the other Question Sets being used this academic year. **However, the majority of questions in the tournament are not referenced in the study guide.** The study guide is meant to help you get started. It is not meant to be fully comprehensive as the essence of academic competition is not memorizing a list, but having wide-ranging knowledge.

As the questions are all short paragraphs on a particular topic, if a topic is found below, then it is a good idea to learn more about it (since additional facts about a topic will also be referenced in the question). It is also helpful to read the introduction of a Wikipedia page on a topic. Please also use the National and Regional Capitals Study Guides and our past question sets which are [found here](#). Many of the topics that are found in past years' questions will come up this year too. Good luck!

Note: This academic year, the study guides are slightly shorter than in past years, but we are also including a list of additional terms at the end. These are also likely to be referenced at some point in the tournament, but you will need to do some research to learn about the significance of each of these.
